ELSEVIER

Operations Research Letters 23 (1998) 183–184

operations research letters

Author Index to Volume 22 (Erratum)*

The issue number is given in front of the page numbers

Balinski, M. and N. Shahidi, A simple approach to the product rate variation problem *via* axiomatics (4–5) 129–135
Barzilai, J., On the decomposition of value functions (4–5) 159–170
Brimberg, J., R. Chen and D. Chen, Accelerating convergence in the Fermat–Weber location problem (4–5) 151–157

Chen, D., see Brimberg, J. (4–5) 151–157
Chen, R., see Brimberg, J. (4–5) 151–157
Chudak, F.A., M.X. Goemans, D.S. Hochbaum and D.P. Williamson, A primal–dual interpretation of two 2-approximation algorithms for the feedback vertex set problem in undirected graphs (4–5) 111–118

Dahl, G., Polytopes related to the l_∞-distance between vectors (1) 49– 54
de Kok, T., see van der Heijden, M.C. (4–5) 179–182
Deĭneko, V.G. and G.J. Woeginger, A solvable case of the quadratic assignment problem (1) 13– 17

Fuller, J.D. and F.H. Murphy, On the convergence of the decoupling algorithm for multiperiod equilibrium models (1) 33– 39

García-Palomares, U.M., A superlinearly convergent projection algorithm for solving the convex inequality problem (2–3) 97–103
Goemans, M.X., see Chudak, F.A. (4–5) 111–118

Hansen, P., N. Mladenović and É. Taillard, Heuristic solution of the multisource Weber problem as a *p*-median problem (2–3) 55– 62
He, Y., see Lin, G.-H. (2–3) 75– 81
Hochbaum, D.S., see Chudak, F.A. (4–5) 111–118

Iwata, S., T. Matsui and S.T. McCormick, A fast bipartite network flow algorithm for selective assembly (4–5) 137–143

Jünger, M. and S. Thienel, Introduction to ABACUS – a branch-and-cut system (2–3) 83– 95

Kim, D. and W.J. Lee, Optimal coordination strategies for production and marketing decisions (1) 41– 47
Klinz, B. and G.J. Woeginger, One, two, three, many, or: complexity aspects of dynamic network flows with dedicated arcs (4–5) 119–127

Lann, A., G. Mosheiov and Y. Rinott, Asymptotic optimality in probability of a heuristic schedule for open shops with job overlaps (2–3) 63– 68
Lee, W.J., see Kim, D. (1) 41– 47

*This index should have been published in Volume 22, pp. 183–184.
